

| HCLSoftware

At HCLSoftware, we aim to empower businesses worldwide with the tools to navigate the digital transformation into the Digital+ Economy. We are united in our commitment to deliver best-in-class software and services. We focus on the four pillars of the Digital+ Economy: Digital transformation, data & analytics, AI & automation, and enterprise security.

OUR PRODUCT

HCL ACTION DATA PLATFORM

HCL Action simplifies business operations by streamlining data connectivity, management, and analysis. Its Data Platform offers enterprise-grade services for integration, management, and analytics, presented in a trusted and flexible platform. Users can easily connect with and manage their data, leveraging advanced analytics capabilities. A free trial allows businesses to explore its features firsthand, experiencing the platform's potential benefits without initial investment.

HCL DATACONNECT

Unlock the full potential of your data integration with HCL DataConnect. Seamlessly unify, transform, and orchestrate data pipelines with ease through the Actian Cloud Data Platform. Features include effortless source-to-target mapping, automated data pipeline creation, and robust data compliance checks. Empower your organization with a data-driven culture through governed, self-service integration capabilities. Whether on-premises or part of the Actian Data Platform, HCL DataConnect offers intelligent, low-code solutions for complex integration needs, ensuring high-quality results with every interaction.

HCL VECTOR ANALYTICS DATABASE

HCL Vector Analytics Database revolutionizes analytics with its scalable, secure, and flexible platform. It boasts industry-leading performance, handling continuous updates with full ACID compliance on various platforms, including on-premises and major cloud providers. With features like resource optimization, real-time insights, and flexible deployment options, Vector ensures fast, efficient, and compliant analytics for businesses of all sizes. Experience the power of Vector with a 30-day free trial, available on-premises or in the cloud.

HCL ZEN EDGE DATA MANAGEMENT

HCL Zen Edge Data Management empowers digital transformation by enabling AI-driven decision-making at the edge. With a single, secure, and scalable architecture, it supports concurrent read and write operations across diverse environments. Its speed outperforms leading databases, and it ensures data security through encryption. By eliminating the need for ETL between devices and cloud environments, it enhances efficiency while minimizing integration costs and security risks. Experience the simplicity and power of Zen for your IoT and edge applications today.
